RICHMOND, CALIFORNIA, FRIDAY, SEPTEMBER 14, 1923

No. 37

San Pablo Ave. Scene of Sensational Robbery

Emeryville Bank Held Up and Robbed Yesterday

Emeryville, Sept. 13.—Soon after the Emeryville Bank was open for business this morning four armed bandits entered the bank and looted the cages and vault. The bank is a branch of the American Bank of Oakland, and is located at 44th street and San Pablo avenue.

All the cash in sight was raked into the bags by the bandits, who took their time in sorting out the money from checks and traceable securities.

Manager of the bank, W. P. Stone, and two clerks were in the bank at the time, besides a customer. All were made to lie down on the floor, under threat of death, and to make no noise nor open their eyes.

One bandit stood guard outside, while three did the looting.

When the job was completed, they leaped on their waiting auto and sped away.

The loss is estimated at \$3000.

Eclipse Gave a Poor Performance

The eclipse did not come up to expectations, and was a rather tame exhibition. It was advertised to do certain things, and give us a good run, but the weather man pulled a fog and spoiled the show.

Pugs Mix Tonight; Dempsey Is Favorite

New York, Sept. 14.—The ring contest between pugilists Dempsey, world champion, and Luis Firpo, the Argentine champion, is staged for tonight, with Dempsey favorite in the betting.

A large number of bogus seat tickets have flooded the city. The police have succeeded in securing the plates from which the tickets had been printed, and arrests will follow.

Motor Co. Starts Work at Ellis Landing

The Consolidated Motor and Freight Co. have started construction work on their warehouse at the south terminus of Tenth street, and business will soon begin to come through the inner harbor to this point of distribution. The company has taken a five-year lease on the landing.

Elks Delegates

Richmond Elks delegates to the state convention which meets at Eureka Sept. 19-22, appointed by the exalted ruler Tuesday night, are:

Thomas M. Carlson, Lou W. Schroeder, Jack Becker, Martin Joast, F. C. Dietrich, H. Aine, A. A. Alstrom, Harry Hays, Frank Silva, Dr. A. B. Hinkley, Claude Clark, Wilbur S. Pierce, T. D. Morgan, Frank Bennett and Bert Curry.

Had Close Call On U.S. Destroyers

Ensign Wm. E. Stock, brother of Dr. C. A. Stock, local dentist, was an officer on the "Chauncey," one of the wrecked destroyers which foundered on the rocks near Santa Barbara. Ensign Stock escaped without injury.

Red Cross Drive For Jap Fund Nears Finish

Richmond Chapter of the American Red Cross have about completed their drive for funds, and the \$3250 quota has been more than raised, it is reported. Red Cross headquarters at Washington report that the special fund of five millions has been raised, with an excess of \$100,000, with many districts yet to hear from.

Pays Us a Visit

Congressman Charles F. Curry was in Richmond Tuesday and met a number to his old friends, who were all glad to see him looking so well after his sea voyage.

As chairman of the territorial committee he went to the Hawaiian islands to get first hand information as to conditions there.

He was treated royally while in the islands, and before landing a salute of 17 guns was fired and a flock of airplanes swarmed around over the vessel, making more "fuss and feathers than I may be entitled to," said Charlie who is one of the old school of plain and substantial Californians whom we can rely on and who has done so much for Richmond.

Congressman Curry will return to Washington October 15.

Mayor to Call Mass Meeting

At a meeting of the business men of Richmond and visitors interested in the growth and prosperity of the city yesterday, it was decided to reorganize the chamber of commerce and inject some new life in it. Speakers from out of town offered suggestions. Mayor Scott was asked to call a mass meeting of the business men and interested citizens that a permanent and effective boosting body may be organized. The mayor will announce the date of the meeting.

Contains Zinc Poisoning

Washington, Sept. 13.—The U. S. Bureau of Chemistry issued a warning against the use of food or drink which has stood for even a short time in galvanized iron vessels. It also warns against the use of galvanized utensils in making preserves or jellies or as such containers for cider or jelly or any fruit juices. It has been ascertained that food or drink, even distilled water, placed for any length of time in such vessels, contains zinc poisoning.

Richmond Girl to Leave For Manila

Miss Jessie Lambrecht, who is one of the popular Richmond girls, and who has been an employee in two of the banks here, will take passage on the "President Cleveland," which sails for Honolulu and Manila Sept. 20. Miss Lambrecht will stop at Honolulu for a brief time and visit relatives. At Manila she will make her home with her sister, Mrs. S. R. Hawthorne, formerly Ethel Lambrecht.

K. P.'s at Neptune

Many members of the Knights of Pythias will attend the reunion to be held in Alameda at Neptune Beach tomorrow.

U. S. Bureau of Mines Trains Miners in Safety Methods

Washington, Sept. 14.—The recent mine explosion in Idaho served to call attention to the fact that the Department of the Interior, through the Bureau of Mines, trains annually 12,000 coal miners in safety methods and in rescue and first aid work. Ten mine rescue stations and ten safety stations are maintained by the U. S. Bureau of Mines in various mining sections of the country for the purpose of aiding in rescue and recovery operations in mine disasters. In addition, the bureau maintains nine automobile trucks for quickly rushing to accidents not easily reached by rail.

In the past 14 years the U. S. Bureau of Mines has investigated 300 coal mine disasters for the purpose of ascertaining causes and preventing. Near Pittsburg it maintains at the government's expense the only underground mine in the world devoted exclusively to experimental work.

Tourists Stop Off to Look Us Over

Mr. and Mrs. Blair, who formerly lived in Imperial Valley, but of late years have made Los Angeles their home, stopped off in Richmond and Albany yesterday to call on friends and look after their property interests in Richmond. The Blairs had been visiting in the east, and came west over the Canadian Pacific, the scenic route that has all others beat, they said. They returned last night to Los Angeles over the coast route.

High Prices in East

Howard Clements, nurseryman and fruit grower of Southern California, stopped off in this city Monday and Tuesday to visit old acquaintances who were his neighbors in former years back in the middle states. He says that everything is sky-high back there, prices far in excess of those here. A meal that costs \$1.00 here is \$2.00 there in Chicago or New York, and also in Canada, which country he visited, returning over the Canadian Pacific.

GET BENEFIT FROM GERMS

Peculiar Reason Advanced for Healthful Conditions That Prevail in Many Large Cities.

Cities evidently are more healthful places in which to live than "the great open spaces" of the country, according to Dr. William H. Park, director of the research laboratories of the New York department of health.

City dwellers are becoming immune from diseases because of constant contact with the germs that produce them, their bodies thus being strengthened by nature against sickness, said Doctor Park.

A recent examination of 400,000 school children disclosed that many of them had diphtheria germs, but comparatively few became ill and died. Tendency of city dwellers to become immune was first noticed during the war. It was found at camps that men from larger cities did not succumb to epidemics as easily as men from rural districts. The country man is not stricken by disease so often, but when he is the disease is more serious in form.

The figures of Germany's external trade for the year 1922 show that the exports of boots and shoes totaled 5,124 tons in 1922, as against 3,912 tons in 1921, while of slippers 540 tons were exported last year, against twenty-eight tons in 1921. The bulk of these exports went to the Netherlands, the Sarre and Denmark.

Safer to Have Chemist Analyze Your Hootch

San Francisco, Sept. 14.—It is better to adopt the slogan "Safety First," than to take a chance on bootleg whisky, according to a bulletin just issued by the federal prohibition agent of the U. S. Treasury Department who tells how they are "making it" in some parts of the Lone Star state, Texas: "Flies, roaches, gnats and wasps, to say nothing of dirt and filth, were found in 'bootleg' liquor destroyed in Bexar county, Texas, Group Head Hamilton declared. Destruction of 500 receptacles, ranging from pint bottles to five gallon jugs, filled with this fluid in the basement of the federal building revealed that retailers in this illicit trade care nothing for the lives of their customers. Sold-ered milk cans, coils out of water heaters and lard cans daubed with floor dough at the top, to seal up cracks, are among the kinds of crude stills captured during the past few months.

"But it is the deadly nature of much of the bootleg whisky which is doing most towards stamping out of the trade. The liquor made in brass fire extinguishers, for example, is of a greenish hue, Mr. Hamilton stated. This is colored with burnt sugar. About one out of every 10 persons arrested on wet charges is a woman, statistics show. They are in the business merely because their husbands or men folks are engaged in it."

MODERN EDUCATION

A New York school teacher visiting in this city was talking about the modern child's lack of knowledge of common things, the Detroit News comments. "You know," she said, "cows have been placed in some of the zoos in the larger cities, for the reason that so many children had never seen such an animal. In New York recently it was shown by questioning that many of the small children do not know that hens have feathers. All they had ever seen in that line were the dressed fowls in the markets. How could they be expected to know that a hen wears feathers?"

A GUIDING FRIEND

Claude Wallin, widely known in Indianapolis Republican circles, recently went to the hospital for a minor operation. His friend, John Orman, visited him.

"What can I bring you the next time I come?" Orman asked. "Bring me something to read, John."

The next day Orman returned to the hospital. He carried with him a guide to Indianapolis.

"Why did you bring this?" Wallin asked, slightly "peevish."

"So you can find your way around town when they finally let you out," Indianapolis News.

Juvenile Court Report Issued by Children's Bureau

Washington, Sept. 13.—The Children's Bureau of the U. S. Department of Labor has just issued a report upon juvenile courts. It is a product of two years' study of juvenile court work throughout the country and was prepared by a committee composed of leading court judges and workers in the United States. It is called "Juvenile Court Standards" and it will be placed in the hands of all juvenile court judges, probation officers and others engaged in juvenile court and children's welfare work.

THE RICHMOND TERMINAL

is the oldest newspaper in Richmond.

University Saucer Is to Be Ready For Big Game

Berkeley, Sept. 15.—Plans for the dedication ceremonies of the new stadium at the University of California are assuming tangible form, and it is believed the big bowl will be entirely completed for the opening event, the big game with Stanford.

The game will be played Saturday, November 24. It is believed the seating capacity of the stadium will accommodate the crowd which it is thought will be near the hundred thousand mark.

RANDOM COMMENT

Those who complain about the accommodations at Ellis Island seem to overlook that those who make use of them do it voluntarily. The United States does not insist on immigrants.

The doctrine of government purchase may as well apply to cotton, corn, or potatoes as to wheat. Why not encourage over-production of all farm stuff?

Prophecy of a revolution for this country is the poorest way a prophet can put in a day. We'd sooner predict a pennant for a tail-end ball team.

If the tariff increased the price of sugar what caused it to decline in price?

A fire truck has been invented which has an individual motor on each wheel.

Right Up to the Times

While the wedding ceremony was going on, a baby of one of the wedding guests cried incessantly. "Wasn't that crying terrible," exclaimed the maid of honor. "When I get married I'm going to have engraved on my invitations, 'No babies expected.'"

Nothing in a Name

Machinery Salesman—"I'd like to interest you in this cotton gin—the cotton gin, you remember, was one of the world's greatest inventions."

Sappo—"Is that so? Well, you can send me up a dozen bottles. I'll try anything once."

Telephone Notes

The summer issue of the New York City telephone directory contained 3676 pages with 718,000 listings and consisted of 1,160,000 copies.

In New York City there are now 125 central offices connecting approximately 1,200,000 telephones in the greater city.

During the six months of 1923, from January 1 to June 30, the Bell System showed a growth in owned telephone stations of more than 400,000.

There were enough telephone calls in the United States during 1922 to keep one line "busy," at 3 minutes per call, for 104,000 years.

The continent of Australia, with approximately the same population as New York City, has less than one-fourth the number of telephone.

If all the telephone wire in the United States were enclosed in cables, each containing 10 complete circuits, there would be 68 of these cables girdling the earth at the equator.

Mrs. Clarence A. Odell is visiting her sister in Los Angeles. Mrs. Mattie Richardson, teacher in one of the schools of that city.

Ten High Class Acts; First-Class Musicians

Segregation Stops the Extravagance in Teaching

Washington, Sept. 13.—The segregated school in which backward children are separated from their more intelligent associates, has been condemned by some as more expensive than the "straight" school. Statistics prove that it is slightly more in cost than the old scheme, but also show that a great saving is effected in teaching and in time.

Miami, Florida, reports that in her split schools the percentage of failures has been reduced from more than fifteen to less than five per cent, and that one-tenth of her enrollment has received an acceleration of a half year. Superintendent Tupper of the southern city's school system, says:

"Failures represent wasted teaching; teaching bought and paid for, but which has failed to result in proper development, which must be repeated and paid for again. A reduction of failures from 15.3 to 4.7 per cent is a reduction in the amount of wasted teaching equivalent to \$8000 annually.

Attention, Charlie Annett

Visalia, Cal., Sept. 14.—Clarence Ward, said to be the nation's oldest telegrapher, died here, Tuesday, aged 79, after 60 years' service at the key. Ward taught Thomas Edison to be a telegraph operator in Michigan in 1857, and served as an operator in General Grant's headquarters during the civil war.

He retired as manager and operator of the Postal Telegraph Co. here last year, after 32 years continuous service.

County's 100th Anniversary Discussed by Club Women of Contra Costa County

Seventy or more club women of the county gathered at Masonic Temple on the West Side Wednesday where they discussed the celebration of the 100th anniversary and delved into historical events and the study of the work connected with the women's part in the program.

The morning session was devoted to business, followed by a most sumptuous luncheon, the tables being artistically decorated with red and yellow flowers, with paper favors to match, symbolic of the fall season.

An excellent program was rendered in the afternoon. The West Side Improvement Club was hostess of the day's session.

SPECIALIZE IN TURKEYS

The Pike's Peak Turkey Growers' association is an organization of women which embraces El Paso county, Colorado. Only a year old, it already is doing a big business, shipping dry-picked turkeys in car lots. The association meets monthly and studies breeds, raising, marketing, and is purely co-operative.

NEW LAUNCHING DEVICE

Caterpillar tractors suitable for use in launching lifeboats are being developed in England from a type of machine originally designed for the snows of Russia and recently employed in crossing the Sahara desert.

Has Pneumonia

A. H. Burnette, formerly of this city, is reported seriously ill with pneumonia at his Oakland home.

Richmond Organized Labor to Stage Circus

The Union Labor Circus to be given by organized labor of Richmond Sept. 22-29 should receive the support of every loyal citizen. And there isn't the least doubt about that. Organized labor has "come to stay," and all fair-minded persons are willing to concede that concerted effort is the way to accomplish things, especially in raising the standard of the workman.

The circus program will consist of ten high class acts. A crack band composed of members of the musicians' union has been engaged. Tickets are now on sale at the Labor Temple, at 25c each, a reasonable price for a first-class show, considering the price paid by many who attended the Ringling and Barnum and Bailey show, where the money was taken away and not spent here.

There will be voting contests, the prizes consisting of six handsome and valuable diamond rings. The contests will be for the most popular lady and the most popular baby—5c per vote for ladies and one cent for the babies. The contests open the 18th and close the 29th of September. L. A. Frates at the labor temple will be pleased to furnish you with tickets and tell you how to win a cash premium. Boost the circus. It is for a good cause.

To Reorganize the Richmond Clerks

W. G. Desepete, international president of the retail clerks' protective association, was in Richmond Friday and interviewed the local clerks in regard to reorganization. A meeting will be called and a plan of reorganization made, so that the union card may appear in the Richmond stores as an insignia of fair working conditions, and that union members can be served by clerks with cards.

Business Agent Beatty Takes Two Weeks Off

Mr. and Mrs. C. R. Beatty left via the water route for Portland Tuesday. Mr. Beatty expects to attend some of the sessions of the A. F. L. in that city before returning. The Beattys expect to be away two weeks.

Will Move to Lake County

J. A. Deadrich has sold out his office supply and typewriter business and will move to Lake county, where he will engage in the real estate business.

Sister From Greece

M. Manis of 16th street was overjoyed when his sister arrived from Greece to make her home here with him. She was detained at Ellis Island, but was finally permitted to enter the United States.

Mary as a "Grownup"

Mary Pickford in her new photoplay "Rosita" has taken the part of a grownup lady, a Spanish street singer. It is doubtful about Mary increasing her popularity in a grownup character. Her "Tess" is the role in which Mary shines and in which she has endeared herself to old and young.

Earth Is Very Old

Lord Rayleigh Puts Its Age at Two or Three Billion Years

By JOHN DICKINSON SHERMAN

MAN is a curious animal and one of the subjects about which he is very curious indeed is the age of the earth on which he lives. He is working at the problem all the time, and from several different angles—the physical, the biological and the geological. Eminent scientists for more than half a century have been working on the problem. To a layman it seems as if any calculation must be merely an intelligent guess, inasmuch as several of the factors must necessarily be based on estimates. And, truth to tell, the scientists' calculations have differed so widely that the layman has had a large variety in the way of choices.

For example, the man who preferred to think that the earth is of comparatively recent formation could tie up to Lord Kelvin, who in 1862 by the temperature method put its minimum age at 20,000,000 years. The fan who wanted an older earth could run with the biological calculations; Poisson in 1896 estimated the minimum age at 400 millions of years.

And now comes Lord Rayleigh, the British scientist, with the announcement of a calculation which shows that the earth has been in approximately its present state for two or three billion years.

Lord Rayleigh bases his calculation on the rate by which radioactive substances decompose. Radium, uranium, thorium and other elements are not stable, but after many years turn into lead. By noting the amount of lead present, and its distribution with reference to the known deposits of radioactive minerals, Lord Rayleigh finds that their proportions must be the result of enormous periods of time.

This calculation will please both the biologists and the geologists. The biologists say that in Cambrian times, the earliest age that geologists can date with certainty, three-quarters of the plant and animal forms of today were present. Cambrian times were about 600,000,000 years ago. Students of living things clearly see that the beginnings of life on this planet must have been much farther back than Cambrian times.

Although formerly the geologists estimated the age of the earth at a maximum of 100,000,000 years only, it has been found that for various reasons this should be multiplied ten or twenty times, so that from the geological point of view the age of two or three billion years is reasonable.

The Scientific American recently published an interesting article on the age of the earth by H. V. Hilker, with the graphic chart herewith reproduced. In addition there is an editorial comment as follows:

Just as there is no definite limit to human ignorance, so there is none to the different ways in which the approximate age of the world may be estimated. Nor is there any to the degree of divergence which may be found between estimates made by two different scientists, in substantially the same way. The necessary assumptions are so broad, the uncertainty so great as to how much faster or slower physical processes may have run millions of years ago than now, that no calculation of the earth's age can be more than an intelligent guess. Indeed, many of the calculations emphasize this by giving upper and

GRAPHIC CHART FROM SCIENTIFIC AMERICAN

lower limits, which are often very far apart.

Regarding the just how much numerical precision may attach to any given estimate, it is fair to say that all estimates make the earth millions of years old. It is again fair to say that all of them are interesting, allies for the method employed and for the result attained. So we have permitted Mr. Hilker to set down the accompanying summary of the eminent scientists who have attacked the problem, the methods of attack which they employed, and the results which they have attained; and we have got our artist to give to the story a graphic form. In the bargain, we summarize here some of the more significant estimates that have been made:

(Table shows date of estimate and name of scientist; third column gives method; 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, GO SWIMMING BUT KEEP DRY

Fair Ocean Mermaids Wear Rubber Bathing Suits That Shed the Water.

New York's beaches are always crowded with bathers that never get wet, as they never go near the water. But this season at the Rockaways has revealed the novel spectacle of fair bathers keeping dry and still going in the surf for a swim, according to the New York Sun and Globe. They wear rubber bathing suits.

Made up in as wide a color variety as silk, the rubber suits also are particularly adapted to decoration. On most of them are imprinted pictures of flowers. Others have designs of seaweed, coral, fish and other things emblematic of the ocean. One great advantage of the rubber bathing suits, say their wearers, is that the ocean water does not seem so cold and on coming out on the sands after a plunge in the surf, there are no soggy, clinging garments to chill the bather.

ENGLISH MEDICAL WOMEN

It was a notable occasion in the annals of the London School of Medicine for Women when Princess Mary, Viscountess Lascelles, recently presented the scholarships and prizes won by the students during the past year. In giving this recognition to the work of the school, her royal highness is maintaining the traditions of her house, for Queen Victoria, intensely conservative as she was regarding many of the newer movements for women, recognized the value of help from their own sex for the women of India; Queen Alexandra has taken part in ceremonial occasions in connection with the development of the school; and Queen Mary has not only visited it repeatedly, but opened at the Royal Free Hospital for Women wards in which women students follow their studies.—London Times.

NO NEED TO SMILE

Flubb—He has never been known to crack a smile with a tradesman. Dubb—Pays cash for everything he buys, huh?—American Legion Weekly.

DOUGHT TO BE AROUND

"Hobbs, have you seen George?"
"Nope. I been looking up in all the trees. Pop says he's hangin' around somewhere."

DEBBIE COULD GIRLDE WORLD

If the chefs and assistants on board the steamship Laconia, which recently completed a de luxe cruise around the world, threw overboard the rinds of the oranges and grapefruit and the shells of eggs which were used on the voyage the debris of the trip would dot the ocean in the wake of the liner, every 300 feet, clear round the globe.

There were 450 passengers on the Laconia, and their cruise lasted 133 days. In addition, there were 450 in the crew, making a total of 900 people to feed during the voyage.

On the voyage there were consumed by the crew and passengers 86,150 pounds of meat, 8,763 chickens, 2,366 ducks, 657 turkeys, 4,778 squabs, 3,375 game birds, 33,890 pounds of fish, 194,540 eggs, 194,580 pounds of potatoes, 31,548 grapefruit, 54,650 oranges, 65,680 pounds of flour and 4,386 pounds of coffee.—Topeka Capital.

NO LADY TRAMPS

"We don't see any lady tramps," remarked the idler.

The philosopher, as usual, was ready to discuss any proposition that came up.

"That is easily explained," he began.

"Shoot," assented the other.

"A tramp depends on castoff clothing," the philosopher continued.

"Well?"

"Do you suppose a woman is going around in castoff short skirts when other women are wearing long ones? You'll never see any lady tramps."

THE TERMINAL

Geo. W. Ryan, Publisher and Editor
ISSUED EVERY FRIDAY.
Established in 1903.
Legal City and County Paper.

Entered as second-class matter June 22, 1904, at Richmond, California, under the Act of Congress of March 3, 1879.
Postage paid at Richmond, California.
Third-class matter, in advance, \$1.75.
Advertising rates on application.

Legal notices must be paid for on or before delivery of advertisement of publication. No exceptions to this rule.

FRIDAY, SEPT. 14, 1923.

Is Gasoline Necessity or Luxury

Thirty-six states will soon impose a consumption tax on gasoline. Various states which are now levying such a tax ranging from one to three cents a gallon, expect to increase their revenues by \$41,607,835 during the current year. Special taxes such as this are easy ways to raise money, but they represent class taxation, not equal taxation. The principle is wrong. It opens an endless field for exploiting the people. Why not tax the oats and other feed consumed by the horse? But as Dobbin is not as popular as the gasoline propelled vehicle, the revenue from this source would be almost nil.

Farmer Presidents

"If the farmer is made successful and secure," said Calvin Coolidge in his last speech as governor of Massachusetts, "there will be no lack of others to enter the field and use all the available land." There have been fifteen presidents of the United States who have come from the farm, but none has been closer to the soil than the new chief executive. The call to the White House found him in his father's phoneless, kerosene-lighted farm house at Plymouth, Vermont, where he had been taking an active part in field operations. New England farms are not as extensive as those of the west, but their owners are confronted with much the same problems. President Calvin Coolidge knows from experience what they are, and the farmers from all sections of the country can look upon him as one of them.

Fair Exchange

Millions of people in Europe to escape the political conditions over there under which they were unhappy would come to this country to abide did our laws but let them in. Would it not be a good idea to make room for some of the best of these by sending over to Europe that class of our people so fascinated with things as it sees them there? Under such an arrangement, we would get rid of a lot of undesirable and acquire something better.

So many of the demagogues and "intellectuals" persist in telling us that we're in a devil of a condition that they've got some of us to more than half believe it.—Marshalltown (Iowa) Republican.

GREATER DEMAND FOR MEAT

Countries of the Far East, Especially Japan, Turning From Traditional Diet of Rice.

The Far East, especially Japan, is eating more meat than in former years, according to D. A. Cameron and H. E. Powell, representatives of the Austrian meat council of Sydney, who have gone to the Philippines to make an investigation with a view to increasing meat shipments to the archipelago.

"There is a growing demand for meat in the Far East," said Mr. Cameron. "The Far East countries cannot supply this demand and we believe Australia is the logical source of supply. We can furnish approximately 30,000 tons of meat yearly."

"Lean meats are sent from Australia to the warmer countries, the fatter meats going to the colder ones. Not all countries want to buy the frozen meats. Java, for instance, likes to do her own killing, and western Australia does a small trade with that country in live bullocks."

During the first six months of this year applications for permits in the United States numbered 45,000, a figure in excess of all previous records.

FURNISHES COFFEE TO WORLD

Brazil Practically Has a Monopoly of Trade in the Breakfast Table Beverage.

Brazil raises 135,000,000,000 cups of coffee yearly. In May coffee trees are covered with red berries which contrast beautifully with the glossy green leaves, glowing like rubies in their dark setting. The berries are about the size of a cranberry, and of the same color. Under the outer husk of red is a sweetish pulp, and within that, the hard berry of commerce. The berries, which at first are green, turn red and finally dark when they are ripe, until almost black. When they are ripe the berries are shaken off the trees, then gathered from the ground by other workers, and poured by the ton into a vast coffeemill which, however, does not grind them, but cracks the hull. This is blown away by a strong current of air, while the imprisoned berries drop to the bottom and are then sorted automatically by passing over a perforated screen. Then, by another set of machinery, these sorted berries are put into bags each of which holds 133 pounds. These are sent by rail to the port. Brazil has almost a monopoly of the world's coffee trade.

BETTER THAN MOVIES

Slats—If Freddy gives you a quarter to go to the movies when he calls, will you go?
Bobbie—Now! I'll put it in my bank and watch the real drummer through the keyhole.

HEIGHT OF BUILDINGS

The highest building in Europe for private business or residence is in Vienna and is 33 feet high. London comes next, with 30-foot structures. Rome's highest is 78 feet. And Paris, who guards her skyline jealously, has no building taller than 63 feet. In New York the Woolworth building is 792 feet high; the Metropolitan, 709; the Equitable 487. London has just granted to Helms & Corbett, New York architects for the Bush Terminal building, permission to erect a building on the Strand front one story beyond the ordained height. The exception was made because of the growing importance of this section of London as a business center. New York's business situation at the tip of a narrow peninsula led to development skyward. London's climate would be intolerable with the streets lined with buildings like New York's sky-scrapers.

ARTIFICIAL MARBLE

The London Chemical society announces the discovery of a way to make artificial marble. Powdered calcium chloride and sodium carbonate are mixed together in equal proportions in water, until they make a stiff paste. The mass is then put into a mold, and pressed with a force of 360 pounds to the square inch, and at a temperature of almost a red heat until the mixture is dry and hard. A number of obscure chemical changes take place, which makes the mass hard as stone, and capable of taking a high polish.

Slabs of this stone are reported to have been turned out after eight hours of heating.

DAMP-PROOF MATCHES

If you intend going camping and want to insure yourself a supply of matches proof against dampness, dip them in very hot paraffin before you leave home. As soon as cool these matches are ready for use. You will find them absolutely damp-proof, a real advantage in a cottage or shack that does not boast electric light or gas.

TRAFFIC THROUGH SUEZ CANAL

Suez canal traffic in 1923 surpassed the record of 1912, the highest previous year, by 468,000 net tons, and reached a total of 20,743,000 net tons. This total tonnage was reached with a passage of 1,028 fewer ships than in 1912, the average net tonnage per vessel rising from 3,773 in 1912 to 4,776 in 1923.

TO HARMONIZE

Mr. Pester—Their dining room was furnished in the Adam period.
His Wife—And how were the women dressed?
Mr. Pester—Neo-Eve period.

HIS PRODUCTION

A smooth theatrical manager persuaded a business man to back a stage venture. The latter, however, was no visionary. He realized that he had been talked into a proposition which carried with it no guarantee as regards profits. But he was game and decided to stick it out. It was in this frame of mind that he met an old friend and chirped: "Well, I'm in the theatrical game. I am now a producer."

"And what are you going to produce?"

"As a starter \$15,000 plunks."

YEAR'S OIL PRODUCTION

If last year's production of oil in the United States were put into oil barrels and these placed lengthwise, touching each other, they would reach from the earth to the moon, and there would be enough left over to go one and a half times around the earth.

CLASSIFIED ADVERTISEMENTS

FOR SALE OR EXCHANGE—4-room cottage, high basement; garage in rear of basement; large lot; city water and electric lights. Will sell very reasonable or exchange for Albany property. Call or address The Argus, Albany, Cal.

RABBITS & CHICKENS—Bought and Sold; also fresh eggs. 923 San Pablo Ave., Albany.

FOR SALE—\$3600; 4-room bungalow; high basement; garage; central location; terms. Call at 828 Talbot ave., Albany.

LOTS FOR SALE—Located at corner of Kansas and Portland, Albany, by owner, price reasonable. Address: 2121 Tenth st., West Berkeley. Phone Berkeley 1668.
